

MODEL ANSHOO BURNER WITH 60'/75'/90' BOOM

Capacity : 12000 BOPD

Features : Designed to dispose off crude oil /diesel, pollution free Pilot ignition system for each burner head.

Consist of Atomizers for multistage automization.

Specially designed nozzle and high velocity of effluent gives flame narrow shape , resulting in reducing heat radiation.

Flow rates up to 12,000 STBD at any water percentage.

Swivel provided in structure allows a rotation in 30° each side of boom axis.

Total length of boom available :

60' - 75' - 90' in 2 - 3 sections

Booms comprises of :

Oil line 3" SCH 80

Gas line 4' / 5" SCH 80

Air 2" SCH 40

Water line 3" SCH 40

Diesel line 1.50" SCH 40

Relief Line 4" SCH 40

Propane line ½" SCH 40

Electric cable

Material of construction :

Suitable for H2S Service as per NACE MR-01-75
